

Seminar on Industrial Mathematics

Sofia, December 19, 2013

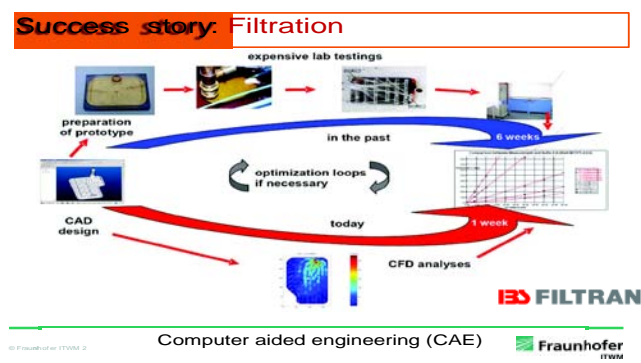

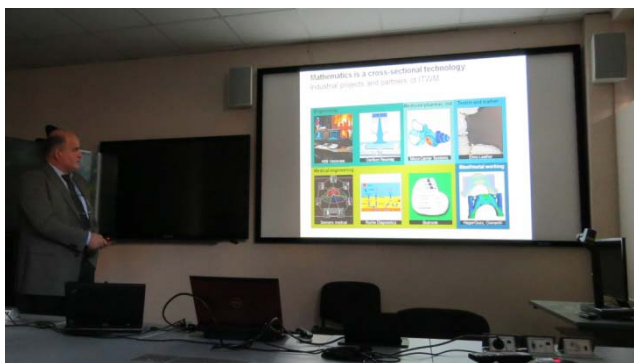

Institute of Information and Communication Technologies
Bulgarian Academy of Sciences

The event was organized in collaboration with Fraunhofer ITWM, Kaiserslautern, Germany (partner in AComIn project). The cooperation with Bulgarian Branch Chamber of Machine Building (<http://www.castingarea.com/societies/bbcmh.htm>) and Cluster Mechatronics and Automation (<http://www.cluster-mechatronics.eu/>) is highly appreciated.

The first part of seminar was devoted to presentation of the SmartLab equipment recently purchased in the framework of the AComIn project.

The program continued with a plenary lecture given by Prof. Oleg Iliev from Fraunhofer ITWM - *Mathematics as technology: good practices in various industrial applications*, followed by presentations of particular industrial applications developed in the IICT.

The workshop was closed with a panel discussion about problems and perspectives in industrial mathematics. The key topic concerned practical issues about collaboration between academic researchers and industrial companies.
