

Doors Open Days at the Institute of Information and Communication Technologies - BAS

The Institute of Information and Communication Technologies - BAS, hold the Doors Open Days in the frames of the project AComIn (Advanced Computing for Innovation) on the 17th and 18th of April, 2015. AComIn is funded under the Seventh Framework Programme of the European Commission in the period 2012-2016. Its aim is to strengthen the IICT research and innovation capacity by recruitment of incoming experienced researchers, upgrading the research infrastructure, enhanced knowledge exchange with leading international partners and the creation of innovative potential at the IICT.

Over 40 poster presentations with scientific and applied results were shown during the Doors Open Days. Part of the results are in the developing of core technologies for simulations and data processing, others concern the applying of modern equipment to modern approaches of information and communication technologies for solving practical problems. The presentation of posters, as well as demonstrations of the devices and software of the so called "Smart Lab", involved the working on the project 11 postdocs and a lot of young scientists from the Institute.

The event was attended by more than 150 representatives of the state administration, ministries and NGOs, scientists from various institutes of the Academy of Sciences and universities, representatives of Bulgarian companies, students and citizens. A large number of Bulgarian media and information websites announced the event and showed reports about it - Bulgaria on Air, Az Buki, TV Europa, Science OFFNews, Vestnikstroitel.bg and others.

The last Doors Open Days in the frames of the project AComIn will be organized in January 2016.
